Print and Copy Tracking for AEC Firms

Built with the AEC industry in mind, Argos tracks print and copy costs while integrating with existing accounting systems, resulting in accurate and on-time billing for every project.

Compatible with large format, MFP, and color production printers, Argos makes a variety of AEC print environments profitable.

Specifically Designed for AEC

With Argos, printing workflows aren't interrupted. AEC printing is complex and can include batching, RIP servers, and custom processes in CAD/BIM software. Argos was built to stay out of the user's way while accurately collecting print data.

For Firms of Any Size

Some of the world's largest AEC firms use Argos, as well as thousands of small to mid-sized firms. From global organizations with hundreds of printers, to small companies with no in-house IT, Argos is a great fit for all of them.

Automated Accounting

Argos seamlessly integrates with industry and enterprise ERPs like Deltek, BST, and Oracle. This keeps project lists up to date and monthly billing a snap.

Print Tracking

Argos stays out of the user's way while collecting as-printed data straight from the printer.

Print Release

Argos provides users with a single print queue. Printing is easy and documents stay secure.

Copy Tracking

No more tedious billing at the copier panel. Argos lets users bill copy costs at the computer.

ERP Integration

Powerful automation keeps billing data accurate and accounting teams happy.
